This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

INFORMATION DISCLOSURE STATEMENT

List of Sections Forming Part of This Information Disclosure Statement

The following sections are being submitted for this Information Disclosure Statement:

1. Preliminary Statements
2. Forms PTO 1449 (now PTO/SB/08A and 08B)
3. Copies of Listed Information Items Accompanying This Statement
4. Concise Explanation of English Language Listed Information Items
5. Identification of Person(s) Making This Information Disclosure Statement

Section 1. Preliminary Statements

Applicant(s) submits herewith patents, publications or other information, of which they are aware that they believe may be material to the examination of this application, and in respect of which, there may be a duty to disclose.

The filing of this information disclosure statement shall not be construed as a representation that a search has been made (37 CFR 1.97(g)), an admission that the information

CERTIFICATION UNDER 37 C.F.R. § 1.10

I hereby certify that this Information Disclosure Statement and the documents referred to as attached thereto are being deposited with the United States Postal Service on the date listed below, in an envelope as "Express Mail Post Office to Addressee," mailing Label Number ER 216 164 121 US, addressed to the: Commissioner for Patents, Washington, DC 20231.

9-23-03
Date

Kenneth A. Keeling
Registration No. 31,842

cited is, or is considered to be, material to patentability, or that no other material information exists.

The filing of this information disclosure statement shall not be construed as an admission against interest in any manner. Notice of January 9, 1992, 1135 O.G. 13-25, at 25.

Section 2. PTO 1449 (Now Forms PTO/SB/08A and 08B)

PTO Form 1449 is attached hereto.

Section 3. Copies of Listed Information Items Accompanying This Statement

Legible copies of all items listed in Form PTO-1449 accompany this information statement.

Section 4. Concise Explanation of English Language Listed Information Items

1. "The Use of Cycloidal Vibrations Therapy on Blood and Lymph Circulation and on Wound Healing," presented at the VII International Congress of Lymphology, Firenze, Italy on October 28 to November 2, 1979 by Lievens, Leduc and Dewald

Suggests that some aspects of wound healing in test mice were improved by a regime of cycloidal vibrations.

2. "The Effect of cycloid Vibration on Leg Blood Flow and Ulcer Pain," presented to the Section of Dermatology of the Royal Society of Medicine in 1978 by Pickup, Alexander, and Gosling
Discloses that while vibration was recognized to dramatically reduce pain from leg ulcers, only a slight improvement in healing was noticed.

3. "The Effects of Vibration Upon Blood-Viscosity and Red-Cell Mobility: A Study In Vivo and In-Vitro," by Ramcharan, Shoja, Piggott and Taylor, published in Biorheology Vol. 19, pages 341 to 352 in 1982

Presents studies of three dimensional, or "cycloid" vibration showing that vibration of either human or rabbit blood in vitro has no effect on blood-viscosity at any sheer rate, on red cell mobility, on zeta-potential or on yield stress. Whole-body vibration produced no significant effect on rheology at rates of shear above 2 s⁻¹, but low-shear viscosity (<1 s⁻¹ Shear rate) became more Newtonian after vibration, with a significant reduction in yield stress from 5.71 +/- 0.14 mNm⁻² to 3.54 +/- 0.32 mNm⁻².

4. "The Effects of Vibration on Skin Blood Flow," by Ryan and Salter, published in Bibliotheca Anatomica, No. 16, pages 180 – 184 in 1977 and presented at the 9th European Conference of Microcirculation in Antwerp, Belgium in 1976

Presents interpretation on effect of vibration. Concludes that the effect of vibration is primarily to disperse tissue fluid, which is therapeutically useful for conditions where stiffness, pain or swelling are directly related to an excess of fluid in the tissues.

5. "Improvement of Blood Flow in Ischaemic Limbs by the Use of Cycloid Vibration Therapy by Askari and Rozov (No publication date is available)

Presents a trial study of applying cycloid vibration to patients with cases of severe occlusive peripheral vascular disease.

Section 5. Identification of Person(s) Making This Information Disclosure Statement

The person making this statement is:

- (a) ☐ the inventor(s) who signs below.
- (b) ☐ an individual associated with the filing and prosecution of this application.
- (c) ☒ the practitioner who signs below on the basis of the information:
 - ☐ supplied by the inventor(s).
 - ☐ supplied by an individual associated with the filing and prosecution of this application (37 CFR 1.56(c))
 - ☒ in the practitioner's file.

Respectfully submitted,

Kenneth A. Keeling
